**ASSOCIATE DEGREE**

ARCHITECTURAL STRUCTURAL DESIGN

CVTC

Build your career with CVTC's Architectural Structural Design degree. This two-year program offers hands-on training opportunities that will help you create a strong foundation in commercial building design and construction.

Become proficient with Revit, AutoCAD, & SDS/2 software that businesses are using and discover how to design, draft, detail, survey, and analyze, giving you the tools you need to succeed in the industry.

With an average starting salary of $50,000 and many jobs available, you will turn your skills into a great-paying job as a critical member of a drafting and design team, preparing 3D models and plans for a wide variety of commercial buildings.
